APPENDIX

RISKS

There are a number of risks that may materially and adversely affect a Purchaser's participation in the Token Sale. Although some of these risks have been described in this Appendix, the information in this Appendix should not be taken as comprehensive or exhaustive.

1. Participation in the Token Sale and purchase of the Tokens carries significant risk. If any risk (including those described in this Appendix) materialises, it could have a severe negative impact on the Token Sale or the Company (including but not limited to the impossibility of continuing a business or the bankruptcy of the Company) and the Purchasers may lose all the funds used to participate in the Token Sale. The Purchaser may incur a loss of part of, or all of, the capital used to purchase the Tokens.
2. The use of cryptocurrencies are, or may be, subject to regulatory scrutiny and control by various regulatory bodies from different jurisdictions. The approach by the regulators towards cryptocurrencies, cryptographic digital tokens and token sales (also known as initial coin offerings) are shifting and may change to the detriment of the Token Sale. The Company could be affected by the regulatory enquiries or actions in different jurisdictions from time to time which could impede or limit the ability to carry out the Token Sale, allow respective Purchasers from different jurisdictions to participate in the Token Sale or continue the development of the Platform. This uncertainty significantly rises the risks connected with participating in the Token Sale or with the acquisition and use of the Tokens.
3. The Company does not and is unable to advise the Purchasers on the relevant considerations in respect of their respective individual circumstances. Prior to purchasing the Tokens or participating in the Token Sale, the Purchaser must carefully consider the risks involved (including but not limited to those stated in these Terms, the Whitepaper, the Website or any other relevant document) and, to the extent necessary, with the relevant legal, financial, accounting, and tax professionals in the relevant jurisdictions. Failing which, the Purchaser may face legal or tax exposures.
4. There is a risk in regard to the changes to the legislation and taxes as well as to the interpretation of the legislation and the taxable status of the Token Sale and the Tokens by the respective regulators and authorities.
5. The Token Sale or Platform may face limited public interest, which may reduce the utility of the Tokens and adversely affect the development, operation and maintenance of the Platform.
6. Although the Company intends to place the Tokens on a secondary market for cryptographic tokens after the Token Sale to enable the free trading of the Tokens, the Company makes no representation or warranty in respect of the foregoing. The circulation and trading with the Tokens after the Token Sale on the secondary market depends whether the Tokens are admitted to trading by the respective secondary market exchange provider. There is a risk that the Tokens will not become available for trading on the secondary market.
7. There is a risk of lack of stability and functioning of the secondary market exchanges for the cryptocurrencies as these exchanges are new and unregulated. This makes the secondary market exchanges more vulnerable to cases of fraud, business or technical failure or new regulations limiting their functioning. There is also a risk that an active trading market for the Tokens will not develop or sustain.
8. There is a risk that the price of the Tokens could experience extreme volatility from time to time as cryptographic digital tokens are and have been subject to extreme fluctuations in price. The volatility of the Tokens could differ between different jurisdictions as a result of approach

towards the cryptographic tokens and initial coin offerings by the respective regulators within these jurisdictions.

9. The Website, the Whitepaper, these Terms and any other document related to the Token Sale may include forward-looking statements, including expected technical or economic results. There is a risk that these forward-looking statements differ significantly as there is a possibility that the predictions in the forward-looking statements will not occur. Thus, the Purchasers should not base their expectations for future success or failure or on the forward-looking statements.
10. The Tokens and the Platform's software are developed on the Ethereum blockchain. Being an open source project, the Ethereum software could be updated or amended from time to time by anyone and it is not possible to foresee the impact of such update or amendment on the Ethereum software, the Platform, or the Tokens developed on the software. However, any update or amendment to the Ethereum software or blockchain could lead to unexpected outcomes that could have significant effect on the Tokens or the Platform.
11. There is a risk that the Tokens, the Platform, any Wallet used, the Website, any secondary market, or any other website are open to attacks by hackers which could result in the loss of part or all of the cryptographic currencies or other cryptographic digital tokens (including but not limited to the Tokens) held by the Company or the Purchaser or have severe impact on the Token Sale.
12. There is a risk that anyone may introduce weaknesses or bugs into the core infrastructural elements of the Tokens causing the loss, destruction or theft of the Tokens.
13. There is a risk of the theft of the Tokens and cryptocurrencies which are transferred from the Company to the Purchaser or otherwise transferred within the platform ecosystem of the Platform.
14. There is a risk that the Platform may not be designed, developed or implemented in the manner and to the extent as described in the Whitepaper. There is also a risk that the Platform and/or the Tokens may not be adopted for use by third parties.
